

# This Month in Pearroc

## ESG NEWSLETTER

### Introducing the latest additions to our electric fleet

In an effort to become more sustainable, we are adding more & more electric vehicles to our fleet. This is helping us with our challenge to reduce the amount of carbon dioxide we release into the atmosphere when making deliveries, which supports our customers with their own reduction targets.

Transitioning from a typical diesel car to a Tesla electric vehicle can result in a CO2 emissions reduction of approximately 50-60%. The reduction is primarily due to the removal of exhaust emissions from electric vehicles and the charging generated from renewable sources.

This allows us to travel more sustainably when attending site visits.

This past month, Emma Foster and Daniel Henstock had the honour of being admitted into The Worshipful Company of Environmental Cleaners as a Freeman.

Very privileged to be a part the livery movement which play's a significant role in the history and tradition of the City of London.

Our very own Daniel Henstock, spent a day Inspiring the next generation's at a careers fair at Highams Park Academy Trust

It was an opportunity not just to educate but to inspire, showing students the impact they can have in our field.

Pearroc were proud to sponsor at the prestigious British Institute of Cleaning Science awards ceremony where they shine a spotlight on the industry's outstanding individuals and companies.

By sponsoring, this gave us the opportunity to showcase our latest innovative sustainable options at the conference during the day.

## Problems with Urinal Odour?

These biological blocks eliminate bad odours found in washrooms with urinals. In addition to getting rid of the smell, the enzymes line the pipes with friendly bugs to eat away at any build-up of scale and solids – saving money on blocked pipes.

### Bio Productions award winning biological urinal blocks and cap

- Substantial blockage reduction
- Up to 95% water savings
- UK manufactured
- No installation cost, simple 'snap in' product **No tools required**
- 100% recyclable
- Available in 30 & 90 day blocks
